

TYPHOON MOD 3 DRYSUIT

As part of our PPE range and in alignment with the DEFRA Flood Rescue Concept of Operations, we offer a selection of drysuits specifically designed for professional water operators engaged in flood scenarios and rescue operations.

Typhoon's MOD3 Rescue Suit is specifically developed and designed for personnel deployed in flood and still water environments, such as lakes, ponds, and canals, where rescue operations may be required.

FABRIC

Polyester / Butyl / Laminate (385 GM/M²)
