

PRODUCT DATASHEET

DEFRA SPECIFICATION MODULE 2 RESCUE (MOD 2 DRYSUIT)

Designed in accordance with the DEFRA Flood Rescue Concept of Operations, the MOD 2 drysuit is purpose-built for professional water rescue teams responding to flood emergencies and rescue missions.

The suit is specifically designed for rescue workers across multiple sectors, including firefighting, emergency medical services, search and rescue, and disaster relief. Built for durability, flexibility, and comfort, it enables professionals to perform critical, life-saving operations while ensuring maximum protection in hazardous environments.
