PRODUCT DATASHEET

WATER FIRST RESPONDER DRYSUIT

As part of our PPE range and in alignment with the DEFRA Flood Rescue Concept of Operations, we offer a selection of drysuits specifically designed for professional water operators engaged in flood scenarios and rescue operations.

This drysuit is specifically designed for rescue workers operating across various sectors, including firefighting, emergency medical services, search and rescue operations, and disaster relief. These professionals play a critical role in public safety and emergency preparedness, serving as the frontline defence against immediate dangers.
