PRODUCT DATASHEET

WATER RESCUE DRYSUIT

As part of our PPE range and in alignment with the DEFRA Flood Rescue Concept of Operations, we offer a selection of drysuits specifically designed for professional water operators engaged in flood scenarios and rescue operations.

The Water Rescue Drysuit is specifically developed and designed for personnel deployed in flood and still water environments, such as lakes, ponds, and canals, where rescue operations may be required.

Approvals

- PPE Cat I with testing from EN14225-2:2017
